Whats happening this month...

Happy New Year to everyone, we hope you and your families had a very happy Christmas and celebrated in the New Years arrival safely. Thank you to all our valued customers for supporting us in 2019, we are excited for the next generation to continue looking after you in the new year. We saw a big change at Pakenham Produce in 2019, with the retirement of the founder Peter Van Diemen, and us the next generation now taking over we look forward to evolving our business and continuing where Peter left off! We are also constantly looking at ways we can improve our processes and service to all our valued customers. So if there's anything we can help you with to improve your properties, look after your animals or excel in your competitions please let us know. We're more than happy to help when and where we can. With Kindest regards **Bree Ure**

ESSENTIAL ELECTROLYTES

This summer it is especially important to provide electrolytes for your horses with the changing weather and heat waves, be on the look out for fluid loss and heavy sweating as this allows a large electrolyte loss.

Carbalene

Carbalene is an oral mild diuretic and body acid neutralising solution for horses. Carbalene is for use as a buffering aid in acidosis, dehydration and tying up. The buffering capacity of Carbalene helps to return the pH of blood and body fluids to normal levels.

Humidimix and Stresslyte

HUMIDIMIX is a specially formulated supplement that contains high levels of potassium, chloride and magnesium to encourage drinking and help with replacing essential electrolytes in horses recovering from sweat loss due to heat, humidity and intense or prolonged exercise. **STRESSALYTE** is a specially formulated alkaline electrolyte supplement, scientifically formulated to provide a daily electrolyte supplement for horses that do fast work over a short period of time. Helping to buffer acid build-up, the unique alkaline mix also helps horses with poor finishing ability or muscle stiffness, soreness and fatigue.

Salkavite

Supplies a concentrated source of all critical electrolytes and provides B-Group Vitamins. Helping to maintain optimal body fluid balance while supplying potent antioxidants essential to peak performance and recovery. Ideal for intense work, travelling, endurance or basic daily supplementation.

Cell-salts

Cell-Salts is a unique salt mix containing higher amounts of potassium, chloride and magnesium compared to many electrolyte replacers, along with sodium, to make up shortfalls in common grain and hay based diets. Potassium and magnesium salts are coated with highly refined, stabilised vegetable oil to help extend their release and uptake, which also helps to reduce dust and the 'salty' taste.

KelatoLYTE

KelatoLYTE is a scientifically formulated electrolyte replacer designed to mimic the composition of horse sweat. Supplementation with KelatoLYTE will help to reduce the risk of dehydration and associated disorders such as poor performance, fatigue, muscle stiffness, and colic.

COWBOY MAGIC SHAMPOO & CONDITIONER

Shampoo: The fast working ingredients break down dirt and unwanted matter

quickly without damaging hair. Panthenol and silk protein penetrate the hair and deep condition the skin, preventing dryness. The silk molecules reflect prism light giving the hair a rich, natural shine as it restores vibrant beauty. The formula has a double action that allows gentle full strength use without damage. Quick release sudsing surfactants cost us more, but give the user a fast and easy rinse action without buildup. You get more suds and less work because it is easier to rinse.

Conditioner: As it is massaged in, the formula will dissolve mineral and chemical buildup deposited by water. After rinsing, the hair will be left in an ultra clean, almost virgin state. Silk and panthenol penetrate hair and skin, moisturizing and adding body to hair. Neutralizing the hair by demineralizing, it can last for more than a week depending on the water you use and what other treatments are put on the hair after neutralization. Whatever additional process you use, hair will look and feel better. It neutralizes static electricity, tangles are reduced and kept to a minimum as static electricity is controlled by reducing the trace mineral in the hair. The formula is very concentrated and a small amount goes a long way.

January *in the* Garden

- Rocket
- Spring onion
- Carrot
- Zucchini
- Leek
- Basil
- Watercress
- Parsley
- Sage
- Dill
- Mint
- Beans
- Beetroot
- Lettuce
- Radish
- Cucumber
- Pumpkin
- Silver beet

What to plant

JOBS TO DO:

-Wanting those beautiful sunflowers in the garden this year? Now is the time to plant. Avail in small packs

- Make sure to water early in the morning. Note a deeper drink a few times a week is more beneficial this time of year. An application of wettaoil may help if hydrophobic (repels water) Apply mulch to gardens, especially straw or sugar cane mulch to strawberry patches to retain moisture and help repel snails damage as they don't like to crawl over. Avail Yates Waterwise Soil Wetta 30L

-Fruit pests are abundant in January, check for the common critters who live amongst your trees and treat what's necessary. Ask us in store for further advice.

-Give your roses a light summer prune to encourage new growth. We have various secature in store to assist, which you should sterilise with methylated spirits' before use.

-Now is a good time to re-oil outdoor timber furniture with linseed oil to protect and last longer Avail in 1L, 2.5 or 5L

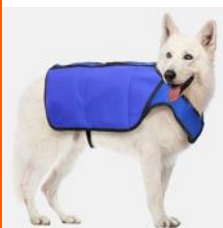

Just Keepin' It Cool In January

Zippy paws cooling vest

- Cooling vest uses long-lasting cooling polymer crystals that absorb water to help keep dogs cool and comfortable for hours.

- Zippy Paws Cooling Vest is a high-visibility reflective vest designed for the active dog. The bright blue colour and reflective stripes help keep dogs visible during night-time walks, and in low-light conditions.

Small \$29.95 Medium \$39.95 Large \$49.95

Chilly Vest

The breathable vest includes cooling gel freezer pack inserts that fit securely into the convenient pockets. All you need to do is strap in your dog and they will beat the heat!

Medium \$35.00

Large \$40.00

BLACKBERRIES BE GONE with weedforce renovate

*With the warmer weather finally upon us it is crucial to be on the look out for blackberry growth. Thriving in the heat, blackberries **can grow two feet on average over night** infesting your garden and taking over your pastures.

*Best to **start the control** of blackberries at the beginning of **October** and continue to spray all the way through to March.

*Weed-force Renovate is a **low dose, low toxicity** herbicide which can be used safely around stock. Relatively slow acting compared with other woody weed herbicides but **very effective in achieving long term control**

*When using renovate remember to **always add Holdfast wetting agent/** penetrant as this improves wetting and penetration of plant foliage to **result in superior weed control** especially of tough, difficult to wet broadleaf and woody weeds like blackberries gorse, and bracken.

*Be sure to **avoid spraying on really hot days** however, as temperatures nearing and exceed 40°C cause blackberries to shutoff their ability to soak up liquid to retain moisture. Meaning that the renovate won't be as effective as it won't be soaked up.

20% OFF DRINKING FOUNTAINS and filters
